

Mohamed Malloug

Position: service technician at Manufor Services, France

attended successfully from 01.09.2016 until 02.09.2016

the following training:

Fall arrest device blocstop - type BSO 1000

location: Bergisch Gladbach

Content:

- Design and function (mechanical and electrical)
- Annual safety inspection
- Maintenance operations
- Test after maintenance/final testing
- Checking of the load handling attachment (hooks and wire ropes incl. evaluation of damages and definition when wire ropes have to be exchanged.
- Maintenance documentation

With this successful training the trainee is considered as trained and certified person authorized to execute works for the above mentioned products. The attendant also must make himself familiar with the appropriate and applicable local public labour protection directives, accident prevention regulation and the generally accepted rules of technology to be able to judge the safe condition of hoistable man riding equipment.

Instructor:

Klaus Schäfer

Tractel Greifzug GmbH

The certificate is valid until 02.09.2017

The certificate loses its validity when the certified person leaves the above mentioned company.

The certificate holder is not authorized to train third parties.

I have read and understood the manual handed out during the training and consider being fully trained to provide the trained work.
